## SKILLS

ReactJs • NodeJs • ExpressJS  
JavaScript • MongoDB • REST-API • Redux  
• Firebase  
Core Java • MySQL • DSA • Python  
Linux • GitHub • TailWind CSS

## EDUCATION

**M.C.A | MASTER OF COMPUTER APPLICATION**

VISVESVARAYA TECHNOLOGICAL  
UNIVERSITY, BELAGAVI  
BANGALORE INSTITUTE OF  
TECHNOLOGY

CUM. CGPA: 8.23 / 10.0  
Oct 2023 | Bangalore, IN

**B.C.A | BACHELOR OF COMPUTER APPLICATION**

BANGALORE NORTH UNIVERSITY  
GOVT. FIRST GRADE COLLEGE  
FOR BOYS

CUM. CGPA: 7.70 / 10.0  
Sept 2021 | Kolar, IN

## EXPERIENCE

**FREELANCING** Dec 2023 - Oct 2024 |  
Remote, IN

- Developed a secure, full-stack password management application using the MERN stack, enabling encrypted storage and retrieval of sensitive user information..
- Enhanced skills in database management, authentication, and authorization while self-learning the MERN stack through hands-on application development for a freelancing project.

## TECHIE AID | INTERN

Nov 2022 - Jan 2023 | Remote, IN

- As an intern focusing on ReactJS, i used moulded unique opportunity to delve into the heart of modern front-end development and work on projects that shape the future of user interfaces.
- I sharpen my ReactJS skills and gain practical experience in building dynamic and responsive web applications.
- I have managed and actively learned and contributed to Techie Aid.

## PROJECTS

### SECUREPASS-APP

- Developed a Password Management System using ReactJS, NodeJs, ExpressJs, MongoDB, showcasing expertise in a diverse and cutting-edge technology stack.
- Enhanced security with OTP-based 2FA for every login, adding an extra layer of protection to user accounts.
- All sensitive data is encrypted using a unique key for each user, ensuring top-notch security and privacy.
- SecurePass allows users to securely store notes, addresses, card details, and bank account information.

Hosted: <https://password-manager-app-peach.vercel.app>

### NETFLIX-GPT-APP

- Developed Netflix-GPT-App with ReactJS, Redux, Firebase, and TMDB API, showcasing expertise in a diverse and cutting-edge technology stack.
- Implemented Redux for streamlined data flow, ensuring a seamless user interface and viewing experience.
- Utilized Firebase for a robust backend, offering real-time data sync and secure authentication. Integrated TMDB API for a vast and dynamic content catalog, reflecting a commitment to a feature-rich streaming platform.

Implemented features for browsing and managing movie data to enhance user experience.

Hosted: <http://netflix-gpt-app-sunilkumaths.vercel.app>

### REACT FOOD DELIVERY APP

- Developed a Swiggy replica using ReactJS and Redux, showcasing expertise in state management and delivering a high-performance, scalable solution.
- Committed to excellence, replicated the Swiggy app with a feature-rich experience, emphasizing modern development practices.
- Styled the application with TailwindCSS, showcasing a modern interface with a sleek aesthetic for optimal user engagement.

Implemented features like ordering the food based on the restaurants
